PROFESSIONAL SUMMARY

Full-Stack Developer (B.Tech CSE, 2026) specializing in React, Node.js, and MongoDB, with hands-on experience building production-grade web applications.

Delivered 4+ projects featuring RESTful APIs, JWT authentication, AI integrations, CI/CD pipelines, and Docker deployments.

Passionate about building scalable, user-facing products and eager to contribute as an SDE-1 in fast-paced engineering teams.

SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Context API

Backend: Node.js, Express.js, TypeScript, REST APIs, JWT Authentication

Database: MongoDB (Atlas), MySQL

Languages: JavaScript, Python, Java, SQL

Tools & DevOps: Git, GitHub, Docker, GitHub Actions, Jest, VS Code, Postman, Vercel, Netlify, Render

WORK EXPERIENCE

Web Development Intern - CodSoft

Oct 2024 - Nov 2024

- Built 5+ responsive UI components in React.js and HTML/CSS, reducing page load inconsistencies across 3 device breakpoints.
- Integrated 4+ Node.js REST endpoints with the frontend, using Git-based version control across 20+ commits.
- Collaborated with a 4-member agile team, meeting 100% of weekly sprint delivery goals over a 6-week internship.

PROJECTS

Inkwell - MERN Blog Platform

Tech: React, Node.js, Express, MongoDB, JWT | [Live Demo](#)

- Architected a MERN blog platform with public feed, private dashboard, and full CRUD across 3+ content types, achieving a 95+ Lighthouse performance score.
- Enabled protected routes, real-time search, category filtering, and like/view counters using Context API for state management.

ShopWave - Full-Stack E-Commerce Platform

Tech: React, Node.js, Express, Stripe, JWT | [Live Demo](#)

- Developed a full-stack e-commerce platform with JWT authentication, role-based access (user/admin), a shopping cart system, and real Stripe payment processing (test mode).
- Secured the checkout flow so the backend independently re-verifies PaymentIntent status with Stripe before order creation, preventing client-side payment spoofing.
- Designed an admin dashboard for product and order management, enforcing double-layer route protection (auth + role middleware) on both frontend and backend.

ResumeIQ - AI Resume Analyzer

Tech: React, Node.js, Express, MongoDB, Google Gemini AI, JWT | [Live Demo](#)

- Created an AI-powered resume analyzer using the Google Gemini API, generating match scores, keyword gap analysis, and personalized improvement suggestions from a resume and job description.
- Engineered a differentiated error-handling system - exponential backoff retries for transient API overloads (503) vs. immediate fail-fast messaging for daily quota limits (429) - improving reliability and user experience.
- Implemented JWT-based authentication, in-memory PDF text extraction (multer + pdf-parse), and shipped a second AI-powered feature (tailored interview-question generator) based on real user feedback.

EDUCATION

B.Tech in Computer Science & Engineering - Pranveer Singh Institute Of Technology, Kanpur (Dec 2022 - 2026)

UP Board, Class 12th - Shree Shah Prabhu Dayal Porwal Inter College, Auraiya (Jun 2021)

UP Board, Class 10th - Shree Shah Prabhu Dayal Porwal Inter College, Auraiya (Jun 2019)

CERTIFICATIONS & DIPLOMAS

- AI and Cybersecurity Awareness - TCS iON, TCS Foundation (Apr 2026).
- Salesforce Trailhead - Explorer Rank, 37 Badges, 8,625 Points.
- Java (Basic) - HackerRank (Oct 2024).
- JavaScript - Infosys Springboard (Mar 2025).
- O Level - Foundation Course in Computer Applications, NIELIT (2025).

KEY ACHIEVEMENTS

- Analytica at TantraFiesta 2025 - IIIT Nagpur - Represented PSIT Kanpur as Team Achievers.
